

## Metadata: General Household Survey (GHS) 2002

The General Household Survey 2002 data is in three files. The files are flat, ASCII, fixed field files, with one line of given length per record. This format was chosen so as to make the data usable with as many statistical programs as possible, and thus accessible to as wide a range of people as possible.

Other important information for users is found in the:

- ◆ Questionnaire
- ◆ Additional code lists (occupation, industry, education)
- ◆ Relevant publications
- ◆ Web-site ([www.statssa.gov.za](http://www.statssa.gov.za))

### THE DATA FILES

The files and the corresponding sections of the questionnaire are as follows:

**PERSON** : Data from Flap and Section 1  
**WORKER** : Data from Sections 2  
**HOUSE** : Data from Section 4  
**STRATUM\_PSU** : Stratum and PSU numbers

The files also contain some derived variables.

The information in each file contains the following:

- Nature of records in the file and population covered
- Description of variables

### Description of variables

The description of the variables comprises the following information:

**Descriptive name:** This is a short English description plus the variable name in the original file used by Stats SA to construct the ASCII file.

**Position of the variable:** The position of the data within the record, recorded in the format (@xxx y.). “@xxx” indicates that the data begins at position (i.e. column) xxx and “y.” indicates that it is y digits wide. All data is numeric. All data is right justified.

**Source:** This is either the question in the questionnaire or, for derived variables, the method of derivation. Derived variables are usually found towards the end of a record.

**Valid range:** The range of valid values for the variable. For continuous variables this reflects the upper and lower limits as found in the data.

**Not applicable:** The code for not applicable is provided for each variable. These are now numeric.

**Missing value:** A code for “missing”/unspecified values is given for each variable.

**Notes:** Specific observations to be noted by users.

Most questions in the General Household Survey questionnaire are pre-coded, i.e. there is a set number of choices from which one or more must be selected. For open-ended ‘write-in’ questions, the description will note that post-coding occurred and

explain how this was done. For most variables the coding is apparent from the questionnaire (available elsewhere in the documentation) and is not repeated in the variable description. Where the coding is not apparent, the description either provides the codes or indicates where code lists are to be found.

## Linking files

The data from different files can be linked on the basis of a record identifier. The record identifier is the first field/s in each file. Each record contains a number (UqNr), which constitutes a unique household identifier. All records with a given household identifier, no matter which file they are in, belong to the same household. For individuals, a further two digits constitute the Person number (PersonNr). When these are added to the household identifier, a unique individual identifier is created. Again, these can be used to link records from the PERSON and WORKER files. The syntax needed to merge information from different files will differ according to the statistical package used.

## METHODOLOGY

### Sample design

A multi-stage stratified sample was drawn using probability proportional to size principles. The first stage is stratification by province, then by type of area within each province. Primary sampling units (PSUs) were then selected proportionally within each stratum (urban or non-urban) in all provinces. Altogether 3000 PSUs were selected. Within each PSU ten dwelling units were selected systematically for enumeration.

The sample was drawn from the master sample, which Statistics South Africa uses to draw samples for its surveys. The master sample is drawn from the database of enumeration areas (EAs), as was established during the demarcation phase of census 1996. As part of the master sample, small EAs consisting of fewer than 100 dwelling units are combined with adjacent EAs to form primary sampling units (PSUs) of at least 100 dwelling units, to allow for repeated sampling of dwelling units within each PSU. The sampling procedure for the master sample involves explicit stratification by province and within each province, by urban and non-urban areas. Independent samples were drawn from each stratum within each province. The smaller provinces were given a disproportionately larger number of PSUs than the bigger provinces.

The master sample is divided into five independent clusters. In order to avoid respondent fatigue, the sample for GHS was drawn from a different cluster from the two clusters already being used for the LFS, which is a twice-yearly rotating panel survey. Altogether 30 000 dwelling units (including units in hostels) were visited for the GHS 2002.

### Weighting the GHS of July/August 2002

A two-stage theoretical weighting procedure was done on the GHS 2002. In the first stage primary sampling units (PSU) are selected with probability proportional to size (PPS) from the census population. The PSU inclusion probability is given by

$$P_{PSU} = \frac{n_{PSU}}{N_{PSU}} n_S,$$

where  $n_{PSU}$  is the number of households constituting the selected PSU during census fieldwork,  $n_S$  is the number of PSUs per stratum, and  $N_{PSU}$  is the number of households constituting the selected stratum during census fieldwork. For GHS urban and rural strata were considered. In the second stage dwelling units were selected sequentially from each PSU in the sample to form clusters of ten dwelling units. The household inclusion probability per PSU is given by

$$P_{HH} = \frac{n_{HH}}{H_{HH}} r_{HH},$$

where  $n_{HH}$  is the number of selected dwelling units per PSU,  $H_{HH}$  is the number of household in the PSU in question at a particular time different from the census time, and  $r_{HH}$  is the response rate given by  $r_{HH} = \frac{n_{RESP}}{n_T}$  where  $n_{RESP}$  is the number

of responding households and  $n_T$  is the total number of visited households per PSU. The adjusted sample weights are now given by

$$W_{HH} = \frac{1}{P_{PSU} \cdot P_{HH}}$$

Because there were undercounts in some PSUs (because households could not be traced or because of refusals to answer), the weight of each such PSU was adjusted upwards by a factor of  $n_{HH}/n^*_{HH}$  where  $n_{HH}$  was the number of households which should have been interviewed and  $n^*_{HH}$  was the number of households actually reached. Then all household weights were adjusted upwards by a further factor equal to the estimated population at the time of the GHS 2002 survey divided by the 1996 Census population estimate, to account for population growth between the 1996 Census (from which the master sample was drawn) and the date of the survey. These doubly adjusted weights are reported as the household weights in the data set.

The person weights are derived by further adjusting the household weights in order to reproduce the marginal totals of the estimated population at the time of the 2002 GHS by gender, population group, province and age group. A SAS macro called CALMAR was used for this purpose.

The population estimate was derived by a 'bottom up' (cohort-by-cohort) exponential extrapolation from the 1996 and 2001 censuses. Such an estimate is quite reliable for the total population and the gender, population group and provincial subtotals. It is less reliable for the age distribution. Improved population estimates will become available when Statistics South Africa completes its short-term population projection model. The weights in this and other surveys may be modified in the light of model estimates.

### Estimation and use of standard error

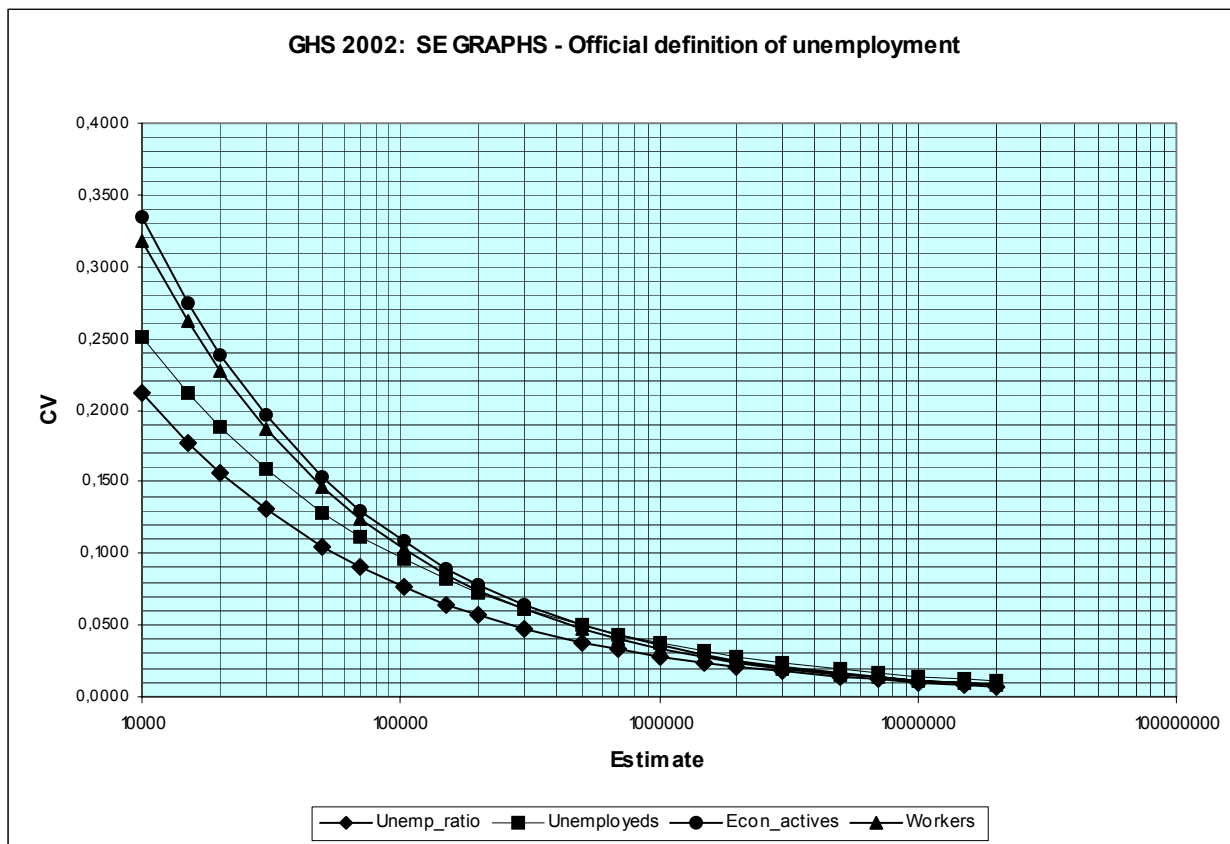

The published results of the General Household Survey are based on representative probability samples drawn from the South African population, as discussed in the section on sample design. Consequently, all estimates are subject to sampling variability. This means that the sample estimates may differ from the population figures that would have been produced if the entire South African population had been included in the survey. The measure usually used to indicate the probable difference between a sample estimate and the corresponding population figure is the *standard error (SE)*, which measures the extent to which an estimate may have varied by chance because only a sample of the population was included.

There are two major factors, which influence the value of a standard error. The first factor is the sample size. Generally speaking, the larger the sample size, the more precise the estimate and the smaller the standard error. Consequently, in a national household survey such as the LFS, one expects more precise estimates at the national level than at the provincial level due to the larger sample size involved. The second factor is the variability between households of the parameter of the population being estimated, for example, the number of unemployed persons in the household.

Figure 18 indicates that:

- the standard error for the employed is 0,0105 (CV) x 11 382 000 (the employed) = 119 511,
- the standard error for the unemployed is 0,0192 (CV) x 4 941 000 (the unemployed) = 94 867,
- the standard error for the economically active is 0,0093 (CV) x 16 323 000 (the economically active) = 151 804, and
- the standard error for the unemployment rate is 0,0140 (CV) x 30,3 (unemployment rate) = 0,42.

**DATA FILE: PERSON**

**Unique number (UqNr)**

(@ 1 13.)

Unique Household Identifier

Note: This is the unique household identifier, which can be used to link data from this file with data for the same households from other files.

**Person number (PersonNr)**

(@14 2.)

Person (respondent) number within Household

Valid range: 1 – 28

Note: The two fields above create a 15-digit unique person identifier, which can be used to link data from this file with data for the same individuals from other files.

**Province (Prov)**

(@16 1.)

South African provinces

Derived variable: Derived from the first digit of the Unique Number.

Valid range: 1 – 9

Values:

- 1. Western Cape
- 2. Eastern Cape

3. Northern Cape
4. Free State
5. KwaZulu-Natal
6. North West
7. Gauteng
8. Mpumalanga
9. Limpopo

**FLAP**

*Gender (C\_Gender)*

(@17 1.)

Is ..... a male or a female?

<b>C</b>	<b>Is ..... a male or a female?</b> 1 = MALE 2 = FEMALE
----------	---

**Note to users**

This question is asked for each household member, to determine their gender. This question is only applicable if there is a “Yes” in the previous question, which determines whether a person is a household member or not. The enumerators are instructed not to assume the gender of the members of the households by just looking at people’s names or physical appearances. In this instance they have to ask the respondent the gender of each member of the household without any assumptions.

**Universe**

Every person who normally resides in this household at least four nights a week.

**Final code list**

- 1 = Male
- 2 = Female
- 9 = Unspecified

*Age (D\_Age)*

(@18 3.)

D. How old is .....? *(In completed years)*

<b>D</b>	<b>How old is .....? <i>(In completed years - In whole numbers)</i></b> <i>Less than 1 year = 00.</i>
----------	--

**Note to users**

This question is asked to find out the age of the household members. This is asked for each member of the household. The instruction is to write the years in whole numbers and not in words. Moreover, these years must be completed, thus if a person is two years and six months, the instruction is to write the two completed years. For those children who are less than a year, the instruction is to write 00.

**Universe**

Every person who normally resides in this household at least four nights a week.

**Final code list**

*Less than 1 year = 0*

Valid range: 15 – 130

Unspecified: 999

*Race (E\_Race)*

(@21 1.)

E. What population group does ..... belong to?

<b>E</b>	<b>What population group does ..... belong to?</b> 1 = AFRICAN/BLACK 2 = COLOURED 3 = INDIAN/ASIAN 4 = WHITE 5 = OTHER, <i>specify</i>
----------	---

### Note to users

This question is asked to determine the population group of persons from the selected dwelling. The respondent must answer for each member without any assumptions. In this instance the enumerator is also instructed not to make any conclusions, which may be influenced by his observation or using people's names during the interview. This question may seem very sensitive to some respondents especially in this post apartheid era, but it is really important to find out the composition of the South African population.

### Universe

Every person who normally resides in this household at least four nights a week.

### Final code list

- 1 = African/Black
- 2 = Coloured
- 3 = Indian/Asian
- 4 = White
- 5 = Other/specify
- 9 = Unspecified

## SECTION 1

*Relationship to the head (q11relsh)*

(@22 2.)

Q1.1 What is ..... 's relationship to the head of the household?

<b>1.1</b>	<b>What is ..... 's relationship to the head of the household? (I.e. to the person in column 1)</b> 1 = <i>Mark the head/acting head</i> 2 = HUSBAND/WIFE/PARTNER 3 = SON/DAUGHTER/STEPCHILD/ADOPTED CHILD 4 = BROTHER/SISTER 5 = FATHER/MOTHER 6 = GRANDPARENT/GREAT GRANDPARENT 7 = GRANDCHILD/GREAT GRANDCHILD 8 = OTHER RELATIVE (E.G. IN-LAWS OR AUNT/UNCLE) 9 = NON-RELATED PERSONS
------------	--

### Note to users

This question is asked for each member of the household to determine their relationship to the head of the household. The respondent is asked to give the information on how each member is related to the head of the household. The enumerator is

instructed to cross-check the information in this question with the one on the flap, especially on the head or acting head of the household.

**Universe**

Every person who normally resides in this household at least four nights a week.

**Final code list**

- 1 = Mark the head/acting head
- 2 = Husband/wife/partner
- 3 = Son/Daughter/Stepchild/Adopted child
- 4 = Brother/Sister
- 5 = Father/Mother
- 6 = Grandparent/Great grandparent
- 7 = Grandchild/Great grandchild
- 8 = Other relative (e.g in-laws or aunt/uncle)
- 9 = Non-related persons
- 99 = Unspecified

*Marital status (Q12Maris)*

(@24 1.)

Q1.2.a What is .....’s present marital status?

<b>1.2.a</b>	<p><b>What is .....’s present marital status?</b></p> <p>1 = MARRIED OR LIVING TOGETHER AS HUSBAND AND WIFE</p> <p>2 = WIDOW/WIDOWER</p> <p>3 = DIVORCED OR SEPARATED</p> <p>4 = NEVER MARRIED</p>	<p>} → <b>Go to Q 1.3.a</b></p>
--------------	--	---------------------------------

**Note to users**

This question is about the marital status of the members of the household. There are different kinds of marriages in South Africa, even if a couple is living together as husband and wife they are regarded to be married. Both modern and traditional marriages are considered in this question.

If the response is widow/widower, divorced or separated and never married the enumerator is instructed to go to Q 1.3.a, which is on mortality for households.

**Universe**

Every person who normally resides in this household at least four nights a week.

**Final code list**

- 1 = Married or living together as husband and wife
- 2 = Widow/Widower
- 3 = Divorce or Separated
- 4 = Never married
- 9 = Unspecified

*Spouse/partner (Q12Spous)*

(@25 1.)

Q1.2.b Does .....’s spouse/partner live in this household?

<b>1.2.b</b>	<p><b>Does .....’s spouse/partner live in this household?</b></p> <p>1 = YES</p> <p>2 = NO</p>	<p>→ <b>Go to Q 1.3.a</b></p>
--------------	--	-------------------------------

**Note to users**

This question is only applicable for those people who said “Yes” in (Q 1.2.a), thus “Married or living together as husband and wife”. It is through this question that it will be seen on average, how many households partners live together.

**Universe**

Only those people who are living in the households with their partners.

**Final code list**

- 1 = Yes
- 2 = No
- 8 = Not applicable
- 9 = Unspecified

*Spouse number (Q12PsnnR)*

(@26 2.)

Q1.2.c Which person is the spouse/partner of .....?

<b>1.2.c</b>	<b>Which person is the spouse/partner of .....?</b> <i>Give person number</i>
--------------	--

**Note to users**

This question is only applicable for those people who said “Yes” in (Q 1.2.a), thus “Married or living together as husband and wife”. It confirms the information on the previous question, which seeks to determine whether couples within the visited household live together or not.

**Universe**

Only applicable to those living in partners within the selected dwelling unit.

**Final code list**

- Valid range: 1 – 16
- Not applicable: 88
- Unspecified: 99

*Father alive (Q13fathe)*

(@28 1.)

Q1.3.a Is .....’s fathered still alive?

<b>1.3.a</b>	<b>Is .....’s father still alive?</b> 1 = YES 2 = No 3 = Don’t know } → <b>Go to Q 1.4.a</b>
--------------	--

**Note to users**

This question wants to find out if the father is still alive or has passed away. The father does not necessarily have to be member of the household. That means one’s father may be alive but living somewhere outside the selected dwelling unit. For codes 2 and 3 the instruction is to go to Q 1.4.a.

**Universe**

This is applicable to each member of the household.

**Final code list**

- 1 = Yes
- 2 = No
- 3 = Don’t know

9 = Unspecified

*Father part of the household (Q13fpart)*

(@29 1.)

Q1.3.b Is ..... 's father part of the household?

<b>1.3.b</b>	<b>Is ..... 's father part of the household?</b> 1 = YES 2 = NO → Go to Q 1.4.a
--------------	--

**Note to users**

This is a follow up question to the previous one (Q 1.3.a), but interested on whether the father is the member of the visited household or not. The instruction is that for those who said "No" the interview must proceed to question Q 1.4.a.

**Universe**

Only for those with "Yes" in the previous question (1.3.a).

Final code list

- 1 = Yes
- 2 = No
- 8 = Not applicable
- 9 = Unspecified

*Father person number (Q13fpsnn)*

(@30 2.)

Q1.3.c Which person is ..... 's father?

<b>1.3.c</b>	<b>Which person is ..... 's father?</b> <i>Give person number</i>
--------------	--

**Note to users**

This is a follow up question, to the previous question (Q 1.3.b) to verify whether the father is part of the household or not. The answer to this question can be cross-checked with (Q 1.1) to find out about the status of the father.

**Universe**

Only for those who said "Yes" in the previous questions (1.3.a and 1.3.b).

**Final result code**

- Valid range: 1 – 13
- Not applicable: 88
- Unspecified: 99

*Mother still alive (Q14mothe)*

(@32 1.)

Q1.4.a Is ..... 's mother still alive?

<b>1.4.a</b>	<b>Is ..... 's mother still alive?</b> 1 = YES 2 = No 3 = Don't know } → Go to Q 1.5.a
--------------	---

**Note to users**

This question wants to find out if the mother is still alive or has passed away. The mother does not necessarily have to be a member of the household. That means one's mother may be alive but living somewhere outside the selected dwelling unit. For codes 2 and 3 the instruction is to go to Q 1.5.a.

**Universe**

This is applicable to each member of the household.

**Final result code**

- 1 = Yes
- 2 = No
- 3 = Don't know
- 9 = Unspecified

*Mother part of household (Q14mpart)*

(@33 1.)

Q1.4.b Is .....’s mother part of the household?

<b>1.4.b</b>	<b>Is .....’s mother part of the household?</b>
	1 = YES
	2 = No → <b>Go to Q 1.5.a</b>

**Note to users**

This is a follow up question to the previous one (Q 1.4.a), but interested on whether the mother is the member of the visited household or not. The instruction is that for those who said “No” the interview must proceed to question Q 1.5.a.

**Universe**

Only for those who said “Yes” in the previous question (1.4.a).

**Final code list**

- 1 = Yes
- 2 = No
- 8 = Not applicable
- 9 = Unspecified

*Mother person number (Q14mpsnn)*

(@34 2.)

Q1.4.c Which person .....’s mother?

<b>1.4.c</b>	<b>Which person is .....’s mother?</b>
	<i>Give person number</i>

**Note to users**

This is a follow up question, to the previous question (Q 1.4.b) to verify whether the mother is part of the household or not. The answer to this question can be cross-checked with (Q 1.1) to find out about the status of the mother.

**Universe**

Only for those who said “Yes” in the previous questions (1.4.a and 1.4.b).

**Final code list**

- Valid range: 1 – 17
- Not applicable: 88
- Unspecified: 99

*Ability to read (Q15Read)*

(@36 1.)

Q1.5.a Can ..... read in at least one language?

<b>1.5.a</b>	<b>Can ..... read in at least one language?</b> 1 = YES 2 = No
--------------	--

**Note to users**

This question is on literacy of the members of the household. It is applicable to each member of the household. A person who is considered to read must be able to read a paragraph of at least one hundred words. That means a person who can only read his name and surname is not regarded as being able to read.

**Universe**

All members of the households in the selected dwelling.

**Final code list**

- 1 = Yes
- 2 = No
- 9 = Unspecified

*Ability to write (Q15Write)*

(@37 1.)

Q1.5.b Can ..... write in at least one language?

<b>1.5.b</b>	<b>Can ..... write in at least one language?</b> 1 = YES 2 = No
--------------	---

**Note to users**

This question is on literacy of the members of the household. It is applicable to each member of the household. A person who is considered to write must be able to write a paragraph of at least one hundred words. That means a person who can only write his name and surname is not regarded as being able to write.

**Universe**

All members of the households in the selected dwelling.

**Final code list**

- 1 = Yes
- 2 = No
- 9 = Unspecified

*Fetching water (Q16FetWA)*

(@38 1.)

Q1.6.a In the last seven days, did ..... spend at least one hour fetching water for home use (not for sale)?

<b>1.6.a</b>	<b>In the last seven days, did ..... spend at least one hour fetching water for home use (not for sale)?</b> 1 = YES 2 = No → <i>Go to Q 1.7.a</i>
--------------	--

**Note to users**

This question is asked to all members of the household, but only applicable in the last seven days. The number of hours is calculated throughout the seven days. Even if a person can spend as little time as possible to collect water per week, as long as the minutes add up to one hour per week she/he qualifies. The instruction in this question is that the water that is collected should not be for sale. If the answer is “No” a person should skip to Q 1.7.a.

**Universe**

For all household members in the selected dwellings.

**Final code list**

1 = Yes  
2 = No  
9 = Unspecified

*Hours spent (Q16HrsWA)*

Q1.6.b How many hours did ..... spend on fetching water in the last seven days?

<b>1.6.b</b>	<b>How many hours did ..... spend on fetching water in the last seven days?</b>
--------------	---

**Note to users**

This question is asked to all members of the household, but only applicable in the last seven days. The number of hours is calculated throughout the seven days. This question is only applicable if there is a “Yes” in the previous question (Q 1.6.a).

**Universe**

For all household members who collected water in the last seven days.

**Final code list**

Valid range: 1 - 42  
Not applicable: 88  
Unspecified: 99

*Fetching wood/dung (Q17FetDu)*

(@41 1.)

Q1.7.a In the last seven days, did ..... spend at least one hour fetching wood/dung for home use (not for sale)?

<b>1.7.a</b>	<b>In the last seven days, did ..... spend at least one hour fetching wood/dung for home use (not for sale)?</b>
	1 = YES
	2 = NO → <b>Go to Q 1.8</b>

**Note to users**

This question is asked to all members of the household, but only applicable in the last seven days. The number of hours is calculated throughout the seven days. Even if a person can spend as little time as possible to collect wood/dung per week, as long as the minutes add up to one hour per week she qualifies. The instruction in this question is that the wood/dung collected should not be for sale. If the answer is “No” a person should skip to Q 1.8.

**Note to users**

This question is applicable to all household members. The enumerators are instructed that it is only those qualifications already obtained which must be entered. That means the current level, whereby a person is still busy with is not applicable. It is very important to complete each record even if the person has not attended school. Moreover the enumerators are instructed that diploma and certificates must be of at least six months duration.

-------------	--

**Note to users**

This question is only applicable to those who answered “Yes” in question Q 1.11. Both distance and correspondence education are included in this question. The enumerators are instructed not to make assumptions by taking people’s ages with the level of education, but rather consider what the respondent gives.

**Universe**

Only members of the household who are currently attending any educational institution.

**Final code list**

1 = Pre-school (including day care, crèche, pre-primary)

**Note to users**

This question is only applicable to the households, which answered “Yes” in Q1.29 (Households with people with disabilities which limit their daily activities). The enumerator is instructed to read out all the categories so that there can either be a “Yes” or “No” answer. Moreover, it is sometimes possible for a person to suffer for more than one disability, hence the categories have to be read out. For any other disability that is not categorized, there is provision to specify them.

-------------	---

**Note to the users**

This question applies to the whole household on services/assistance by the Welfare Office in the past twelve months. The interest in this question is to find out exactly what kind of service/assistance the household received from these offices. For example, was it social grant, poverty relief/job creation project or consulting the Social worker. The instruction to the enumerator is that if the answer is “No” and “Don’t know” for (a, b and c) there should be a skip to Section 2.

### **Note to users**

This question is asked for each household member, to determine their gender. This question is only applicable if there is a “Yes” in the previous question, which determines whether a person is a household member or not. The enumerators are instructed not to assume the gender of the members of the households by just looking at people’s names or physical appearances. In this instance they have to ask the respondent the gender of each member of the household without any assumptions.

**Note to users**

This question is asked to determine the population group of persons from the selected dwelling. The respondent must answer for each member without any assumptions. In this instance the enumerator is also instructed not to make any conclusions, which may be influenced by his observation or using people’s names during the interview. This question may seem very sensitive to some respondents especially in this post apartheid era, but it is really important to find out the composition of the South African population.

### Note to users

This question is applicable to all household members aged 15 and above, regarding their involvement with the economic activities in the last seven days. This is part of the questionnaire where there would be a differentiation between economically active population and those who are not economically active. The instruction to the enumerators is that these activities must be for at least one hour within the seven days. In order to be certain that the categories have been answered there should either be “Yes” or “No” in all of them. Most importantly, is that if there is “Yes” to any part of this question there should be skip to Q 2.3. If all the categories are “No” there should be a continuation to the next question.

	} → <b>Go to Q 2.14</b>

**Note to users**

This is applicable to all household members aged 15 and above who did not work and were absent from work in the last seven days (those with “No” from Q 2.2). The interest in this question is to determine whether people can accept suitable job if given. What must be considered is that there are different reasons why people are not working and would not even accept the suitable jobs when offered as categorised in the previous question (Q 2.10). For those who answered “No” and “Don’t know” there should be a skip to Q 2.14.

**Note to users**

This question is only applicable if a person is prepared to accept a suitable job offer as reflected in the previous question (Q 2.11). The interest is to determine within which period a person would resume the given job.

**Universe**

All household members who would accept a suitable job if offered.

**Final code list**

<b>2.13</b>	<b>During the past four weeks, has ..... taken any action</b> 1 = to look for any kind of work 2 = to start any kind of business
-------------	--

**Note to users**

This question is only applicable if a person is prepared to accept a suitable job offer as reflected in question (Q 2.11). The interest is to find out whether a person has taken any action to look for a job in the past four weeks. The instruction to the numerator is to complete both given categories with either a "Yes" or "No" answer.

**Universe**

All household members who have taken action to look for work in the past four weeks.

### Note to users

This is applicable to household members who answered “No” to all the categories in Q 2.1 and answered Q 2.10. Regardless of whether a person is unemployed or not economically active the interest in this question is to find out whether a person has ever worked before. For those who answered “No” in this question they should skip to Q 2.16.

### Note to users

This is only applicable if there is a “Yes” in the previous question Q 2.14. The interest in this question is to find out for how long a person has worked in the last job he/she occupied. The instruction to the enumerator is to probe for more information as people in this caliber are usually uncertain of the required information.

**Note to users**

This is applicable to all persons unemployed or not economically active regardless of whether a person has worked before or not. The interest in this question is to find out how people support themselves even though they are not working. The enumerator is instructed to ask all the given categories. There should either be a “Yes” or “No” for each category. For any other reason that is not categorised the enumerator has to complete the information in the provided space. If the answer is code “1 = Did odd jobs during the past seven days ” where a person “did odd jobs during the past seven days” the instruction is to go back to Q 2.1.

### **Note to users**

This question is asked for each household member, to determine their gender. This question is only applicable if there is a “Yes” in the previous question, which determines whether a person is a household member or not. The enumerators are instructed not to assume the gender of the members of the households by just looking at people’s names or physical appearances. In this instance they have to ask the respondent the gender of each member of the household without any assumptions.

**N/B Code 4** Isn't part of the questionnaire but was post-coded for those households that did not have children aged 5-17, who live on the streets.

**Note to users**

This question is applicable for all households and interested in children aged between 5 years and 17 years who left their households to live in the streets in the past 12 months. The enumerator is instructed to be cautious about various

circumstances. For example, if members of the household know that their child/ren are living in the street the answer should be “Yes” but if they do not know where they are, the answer should “Don’t know”. There should not be any form of assumption that any child that is not at home is living in the streets.

**DATA FILE: STRATUM\_PSU**

The GHS' is based on multistage stratified cluster sample (i.e. complex samples). The sampling population is first stratified into explicit strata, then pre-specified numbers of primary sampling units (i.e. PSU's) are drawn in the strata, whereupon a fixed number of households are drawn in each drawn PSU's. The consequence of this is that statistical techniques of analysis based on a simple random sample design will give liberal (i.e. too significant) results. This is the case with most generally available statistical software packages. However, dedicate software is available which takes the complexity of the of the sample design into consideration and which requires stratum and PSU numbers. The STRATUM\_PSU data file is supplied for

this type of analysis and can be merged with any of the other three data files i.e. PERSON, WORKER and HOUSE by the variable unique number (UqNr), position 1 to 13.

This file contains stratum and PSU numbers.

*Unique number (UqNr)* (@1 13)

Unique household identifier

Note: This is the unique household identifier which can be used to link data from this file with data for the same household from other files.

*Stratum number (Stratum)* (@14 2)

*PSU number (PSU)* (@16 3)

**Please Note:** To get rid of non-existing stratum numbers all records with invalid weights should be deleted after merging
